This person must have cloud computing, data analytics, video recognition experience as well as a knowledge of communication protocols, sensors, and networks. The VP of Engineering, in conjunction with the executive leadership, team will bring a strong product vision and will build a strong product culture within the organization.

Duties:

- Direct, lead, mentor and cultivate a growing, world-class engineering team
- Work closely with the executive leadership team to develop strategic plans and identify the products services, personnel and technologies necessary to reach company goals
- Identify, develop and put in place programs, policies and procedures to reduce technical risk, schedule risk and ensure engineering excellence
- Establish elastic engineering capacity capabilities
- Track key productivity metrics and continually work towards improving team efficiency and engineering capacity
- Ensure development of extensible architectures and solid technical designs
- Ensure Quake leadership position in the technology market

Qualifications:

- Bachelor's degree in Computer Science/ Software Engineering/ Electrical Engineering, with a minimum of 5 years of VP of Engineering or CTO management experience in M2m/IOT company. Advanced degree preferred
- Strong understanding of the software development cycle using waterfall and agile development processes
- Experience with product development lifecycle of both hardware and software products
- Strong written and verbal skills with the ability to present concepts clearly and concisely using programs such as Word, Excel (charts), and PowerPoint
- Experience with legal aspects of using open source software
- Excellent technical product vision, time management, communication, decision-making, presentation, human relations, and organizational skills
- Strong integrity and highly reliable leader
- Enjoy working in a fast-paced environment

Desired Qualifications:

- Experience with automotive quality standards and processes; APQP, FMEA, PPAP, 8D, etc.
- Experience with Authentication, Encryption and network security
- Experience with SaaS and PaaS software models

Benefits include health and dental insurance, paid holidays and a 401k plan with partial company matching.

This is a great opportunity to work and grow with a thriving company. If you are interested, please reply with your resume and salary requirements.

Quake Global is an Equal Opportunity/Affirmative Action employer. If hired, applicants must present proof that they are legally authorized to work in the United States for an unrestricted period of time.

Applicants from out of the San Diego area will be considered, but applicants should note that relocation expenses will not be paid by Quake.
